

Table 1. Domain Catalog views

<b>View</b>	<b>Displays</b>
Access control lists	ACL information by Database, Level, and Name. Use this view to see who has what level of access to the different databases in the domain.
Content	Documents in the domain by Author, Category, and Date (if your organization has implemented document content categories).
Databases	Databases in the domain by Category, Hierarchy, Replica ID, Server, and Title.
Domain Indexer Status	Last-time indexed for databases included in the Domain Index, by both Server and Indexing Server.
File Systems	File systems and servers included in the Domain Catalog.
